MUHAMMAD HUZAIFA

Full Stack Developer · MERN / MEAN

Phone +92 309 6097999 **Email** muhammadhuzaifa7012@gmail.com **Location** Islamabad, Pakistan
LinkedIn linkedin.com/in/muhammad-huzaifa-99a6bb200 **GitHub** github.com/Huzaifa4472

Full stack developer with **3+ years** shipping production web apps end to end on the **MERN and MEAN** stacks, from MongoDB schema and Node/Express APIs to React or Angular UI. Delivered complete systems in **e-commerce, EdTech, HR and real-time computer-vision analytics**, with hands-on experience in payment gateways (Helcim), AWS S3, Socket.io / WebSockets, Redis and the OpenAI Assistants API. Seeking full stack roles owning features from data layer to deployed interface.

EXPERIENCE

MERN / MEAN Stack Developer | Techlets Pvt Ltd *Jul 2024 – Present*

- Build and maintain client-facing production applications, owning features from API design through to deployed UI.
- Built the **goal-setting and appraisal modules** of **e-People**, an HR platform where managers define, assign and track employee objectives and run periodic performance reviews.
- Implemented **attendance management** with check-in/check-out tracking and reporting, surfaced through separate employee and manager dashboards.
- Work in an agile cross-functional team with designers and QA across regular release cycles.

Freelance Full Stack Developer | Independent — multiple clients *Jan 2025 – Aug 2026*

- **Canopy Intel AI** (May – Aug 2026): sole frontend engineer on an AI camera-analytics product, building the React dashboard layer for retail footfall and construction-site safety analytics.
- Worked directly with the client's computer-vision team to turn raw detection output into operator-facing dashboards and alerts.
- **USA Peptides Lab** (Jun – Dec 2025): delivered a full-stack **e-commerce platform** over a six-month contract using React, Node/Express and MongoDB.
- Implemented **role-based access control** (Admin / Staff / Customer) and an admin panel covering revenue analytics, order management and inventory tracking.
- Integrated the **Helcim payment gateway** for secure card processing, alongside catalogue filtering, cart, checkout and order history.
- **THT Cars Rental** (Jan – Mar 2025): built a responsive **Next.js** booking front end with server-side rendering, location-based pickup/drop-off selection and real-time vehicle availability.

Junior MERN Stack Developer | Deventia Tech *Apr 2024 – Jul 2024*

- Shipped full-stack features alongside senior engineers across React front ends and Node/Express services.
- Refactored existing components and API handlers to reduce duplication and improve maintainability.

MERN Stack Intern | Walee Technologies *Jul 2023 – Oct 2023*

- Built production features in React, Node.js and MongoDB over a four-month internship.
- Developed and documented REST endpoints in an agile team environment.

SELECTED PROJECTS

Canopy Intel AI — Real-Time Computer Vision Analytics
Freelance client project · React · WebSockets · Recharts · Computer Vision APIs

- Dashboard layer for an AI platform that detects and classifies people, vehicles and PPE from live camera feeds.
- Consumed a continuous detection event stream over **WebSockets**, aggregating incoming events client-side to keep charts responsive under sustained updates.
- Built zone heatmap and footfall visualisations across concurrent camera feeds, with time-range selection over historical detection data.
- Designed the alerting UI for safety-gear violations, surfacing helmet and vest detection failures as they arrive from the model.

Learning Management System
Angular · Node.js · Express · MongoDB · Zoom API · Redis · SendGrid · AWS S3

- End-to-end MEAN platform where students enrol in course slots and join live classes through **Zoom API** integration.
- Semester delivery covering video lectures, assignments, quizzes, attendance tracking and end-of-term exams on a per-course academic calendar.
- **Redis** session caching on high-traffic routes; **AWS S3** for scalable video and document storage; SendGrid for transactional email.
- Role-based admin panel for Super Admins and Teachers to manage content, cohorts and grading.

Data2u — AI-Powered Data Enrichment
React · Node.js · MongoDB · OpenAI Assistants API · Socket.io

- Platform that predicts and fills missing attributes in uploaded product catalogues using the OpenAI Assistants API.
- **Socket.io**-driven batch pipeline processes large files in chunks with live server-to-client progress streaming, avoiding request timeouts on large uploads.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frontend: React.js, Next.js, Angular, Tailwind CSS, SASS, Styled-Components, Responsive Design

Backend: Node.js, Express.js, REST APIs, Socket.io, WebSockets

Data: MongoDB, Redis

Cloud & Services: AWS S3, Vercel, Nginx, SendGrid, Helcim, Zoom API, OpenAI API

Tools: Git, GitHub, Bitbucket, Agile / Scrum

EDUCATION

B.S. Software Engineering | COMSATS University, Islamabad *2020 – 2024*

Intermediate, Computer Science | Superior College *2017 – 2019*

Languages: English (professional working proficiency) · Urdu (native)
